The Assignment

1. Compare between <section> and <article> tags in HTML5

Criterion	<section>	<article>
Definition	Defines a thematic grouping of content within a webpage.	Represents a self-contained piece of content that can be independently reused.
Usage	Used to divide content into meaningful sections, such as chapters or different topics in an article.	Used for standalone content like blog posts, news articles, or forum posts.
Nesting	Can contain <article> elements.	Can contain <section> elements if further division is needed.
When to Use?	When content needs to be grouped by related topics.	When content is self-contained and can be shared independently.
